Hamza Dugmag _U of T Engineering Science — Year 2 + PEY Co-op_

✦ hamzadugmag.com ✉ hamza.dugmag@mail.utoronto.ca in hamza-dugmag ○ hamza-dugmag

Professional Experience

Student Leader — Academic Review Mentor (GEARS),
U of T Faculty of Applied Science and Engineering
Aug 2021 – present | Toronto, ON
- Led weekly sessions for Year 1 Engineering Science students.

Rocketry Avionics Lead, _University of Toronto Aerospace Team_
Jan 2021 – present | Toronto, ON
- Led a team of 11 students to deploy ground and flight systems for _UTAT_'s high-altitude rockets.
- Developed data acquisition methods to calibrate load cells and pressure transducers with 95% accuracy.
- Designed surge-protected relay circuits for DC motors using C++ and a Raspberry Pi, increasing power rating by 54%.
- Represented the team in _UTAT_'s recruitment video. ⎘

Natural Language Processing Research Intern,
University of Toronto — Forcolab Group
May 2021 – Sep 2021 | Toronto, ON
- Replicated BERT models for detecting type-III code clones using Python and PyTorch.
- Optimized parameters for hierarchical density-based clustering of _Stack Overflow_ posts on a remote server using Pandas and Docker, increasing precision by 11.1%.
- Presented _"Analyzing Stack Overflow Community Posts to Automate Structured Posts"_ at _U of T UnERD 2021_.

Awards

Dan II Black Belt, _World Taekwondo Kukkiwon_
Dec 2021
International athlete and coach with 7 years of experience.

Fessenden-Trott Scholarship Winner (C$9000),
Universities Canada
Sep 2021
Selected among nominees from every Ontario university on the basis of academic merit and extracurricular involvement.

Dean's Summer Undergraduate Research Pivot Award (C$5000), _U of T Faculty of Applied Science and Engineering_
Sep 2021
Attained Co-Curricular Record for participating in the _Undergraduate Summer Research Program_.

Amateur Radio Operator Certificate, _ISED Canada_
Jul 2021
VA3UFT call sign, Basic with Honours (100% exam score).

Skills

Programming, Data Analysis _(MATLAB, Simulink, Python (tf, sklearn, pd, np, sp, plt), C/C++, Verilog, Assembly, LaTeX, Git, Docker, Unreal Engine, Excel)_

Circuits, CAD _(Arduino, SolidWorks, Raspberry Pi, FPGAs, LTspice, AutoCAD, Soldering, 3D Printing)_

Education

BASc in Engineering Science + PEY Co-op,
University of Toronto (St. George)
Sep 2020 – Apr 2025 | Toronto, ON
- Major in Electrical and Computer Engineering, Robotics & Energy Minors, Business Certificate.
- 3.93 cGPA, 90% average, Dean's List.
- Courses: Algorithms and Data Structures, Digital and Computer Systems, Electric Circuits, Engineering Design I/II/III, Engineering Ethics.

Projects

Automating Water Quality Testing
Sep 2021 – present
- Designed a radio and GPS circuit for remote control and tracking of the marine robot.
- Researched autopilot techniques using sensors.

Modelling a Vibrating Building,
MathWorks MATLAB Summer Hackathon
Jul 2021
- Implemented systems of differential equations to simulate free, forced, and damped vibrations while estimating resonant frequencies in Excel.
- Received the _"Best Use of Simulink"_ award.

Improving Ski Airbag Trigger Systems, _Praxis II_
Feb 2021 – Apr 2021
- Prototyped avalanche detection and Bowden cable pulling mechanisms with an Arduino.
- Created testing protocols for design verification.

Analyzing and Processing Images
Mar 2021
- Implemented a dual-gradient energy function for content-aware image resizing in C.
- Designed a Python GUI to detect blurry images in a specified directory using Laplacian filters.
